

Install Processing

About Processing

Processing is a programming language, development environment, and online community. Since 2001, Processing has promoted software literacy within the visual arts and visual literacy within technology. Initially created to serve as a software sketchbook and to teach computer programming fundamentals within a visual context, Processing evolved into a development tool for professionals. Today, there are tens of thousands of students, artists, designers, researchers, and hobbyists who use Processing for learning, prototyping, and production.

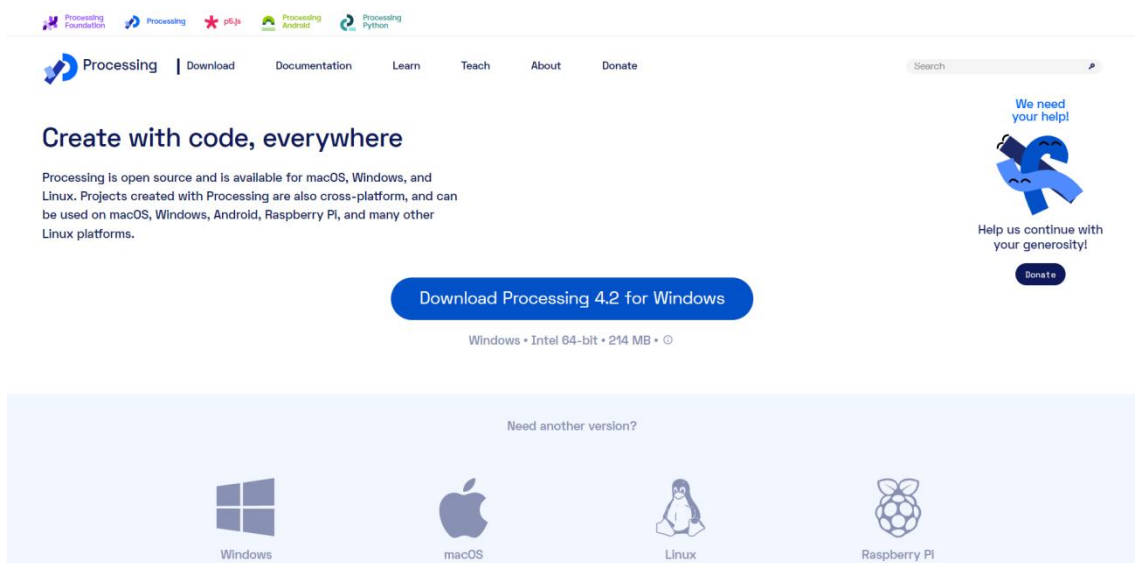

Install Processing

Install Processing

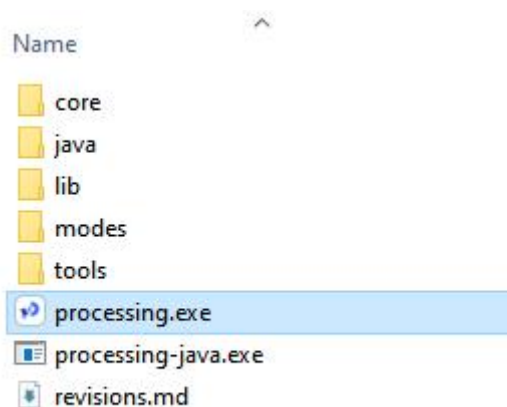

use Processing to build a simple Led Matrix platform.

You can download Processing via the link: <https://processing.org/download/>

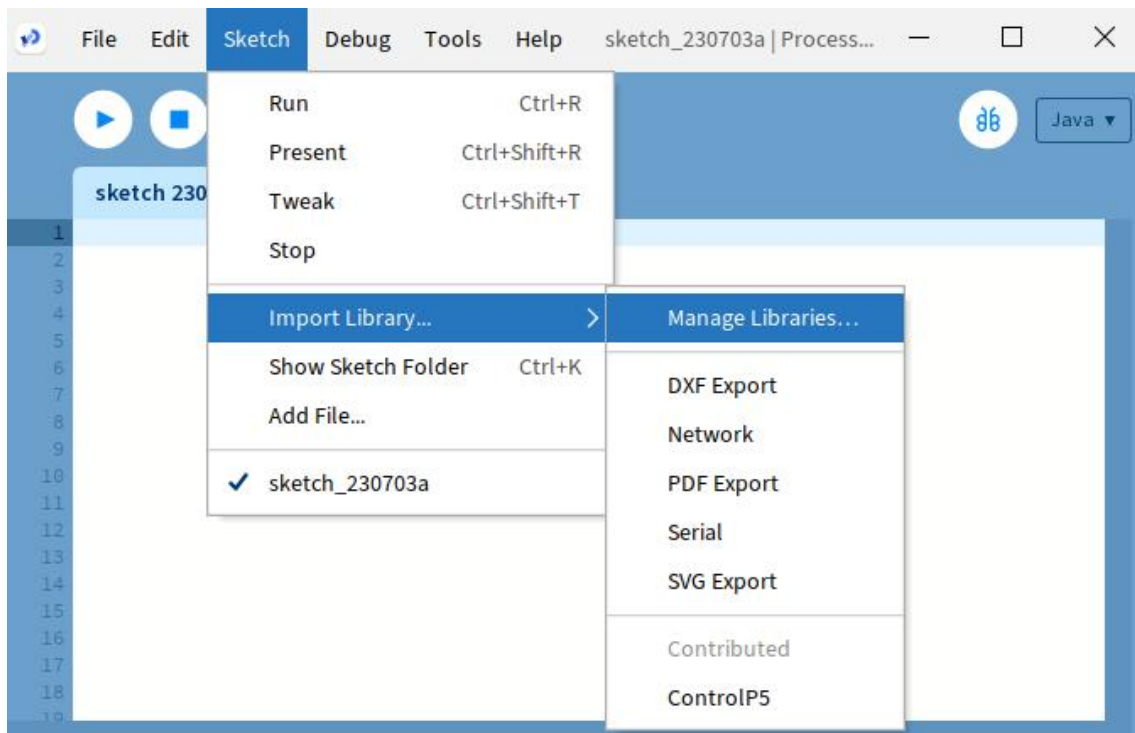

You can choose an appropriate version to download according to your PC system.

Unzip the downloaded file to your computer. Click "[processing.exe](#)" as the figure below to run this software.

In the interface of Processing, click [Sketch](#) on Menu bar, select "[Import Library...](#)" and then click "[Manage Libraries...](#)"

Enter “ControlP5” in the input field of the pop-up window. Click the searching result and then click “install”
