

[About the instructions for the "Hexapod Spider Robot Kit for Arduino" file package]

Thank you very much for choosing to buy our robot products! In order to allow you to better learn and use our robot products, we have carefully prepared the information package of this robot product. During the use process, we hope that you will learn in the order of our courses.

First, you need to open this folder: 01Course Manual, this folder stores the courses of learning robots, every lesson is very important! You must learn and use it in order.

Secondly, the 02Software installation package and 03Course code folders are also very important! They respectively store the code programs to control the robot. In the course in the 01Course Manual folder, we have described how to use the programs in these folders.
